CLARIFY **BUSINESS CONTEXT, GOALS AND** **QUESTIONS**

Project Overview

StreamFlix is transitioning from a free, ad-supported platform to a subscription-based model.

To support this shift, the company needs data-driven insights into user viewing behaviour to determine which movies and genres should be prioritised for retention and growth.

Main Business Goal

Support StreamFlix's transition to a subscription-based business model.

Supporting Business Goals

BG1: Optimise Content Acquisition

BG2: Understand Customer Preferences

BG3: Support Subscription Transition

BG4: Support International Growth

BG5: Support Executive Decision-Making

BG6: Deliver a Power BI Dashboard/Report

Business Questions to Answer

1

Content Investment Decision

Main Business Decision Question

What content should StreamFlix invest in?

Supporting Questions:

- Which genres should we prioritise?
- Which movies should we acquire or retain?

2

Customer Strategy Decision (User Profiling)

Main Business Decision Question

Who are our customers?

Supporting Questions:

- What does the customer base look like (User distributions by age, country, device, and subscription)?

3

Customer Strategy Decision (Segmentation analysis)

Main Business Decision Question

What content do Customer prefer?

Supporting Questions:

- What genres do different age groups prefer?
- How do preferences vary by country?
- How do Free users differ from Subscribers?

4

Subscription Readiness & Growth Decision

Main Business Decision Question

How can StreamFlix successfully transition to a subscription-based platform and support future growth?

Supporting Questions:

- Which users should be targeted?
- Which markets should be prioritised for global growth?

5

Dashboard Design

What should stakeholders track in Power BI?

CHECK **DATA VALIDATION AND** **CLEANING**

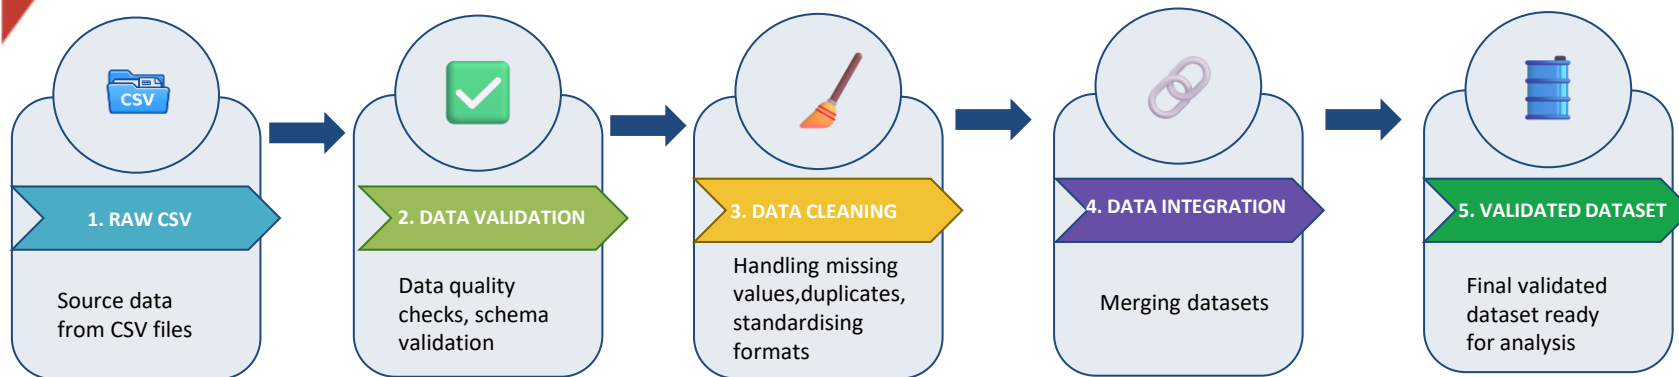

Data Validation & Preparation

Ensuring Reliable and Trusted Data for Analysis

DATA PIPELINE

WHAT WE DID

- All Datasets were validated before analysis
- Missing values, duplicates, inconsistencies were handled
- Data formats were standardized for consistency
- Data was cleaned and integrated into a final dataset
- Only validated data was used for analysis and dashboards

DATASET VALIDATION SUMMARY

Dataset	Records	Status
Movies	3883	✓ Validated
Ratings	10000	✓ Validated
Users	6040	✓ Validated

 **ALL INSIGHTS AND VISUALISATIONS ARE BASED ON FULLY VALIDATED AND RELIABLE DATA**

This ensures accuracy, consistency and trust in every analysis and decision

APPROACH **ANALYSIS METHODOLOGY** **AND APPROACH**

Analytical Approach

Approach: A structured, data-driven methodology was used to uncover meaningful insights and support business decisions.

Why Segmentation Matters

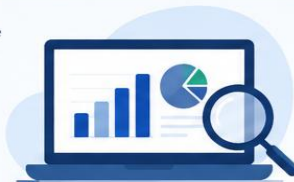

Different audience groups have different preferences and behaviors. Segmentation helps identify these differences, enabling targeted strategies for content, marketing, and customer retention.

ANALYSIS WORKFLOW

Methodology Overview

- ✓ Followed a step-by-step analytical process from data exploration to actionable recommendations.
- ✓ Used statistical techniques and business understanding to identify key drivers of viewer engagement.
- ✓ Expanded and segmented data to gain deeper understanding of audience behavior.
- ✓ Focus on providing meaningful insights that can be translated into business actions.
- ✓ Ensures data-driven decision making for content strategy, marketing and customer satisfaction.

This structured analytical approach ensures accurate insights and supports **smarter, data-driven business decisions.**

Top 10 Movies by Average Rating (Filtered by Rating Count ≥ 5)

Top 10 Most Popular Genres (By Total Views)

Business Insights

- ★ Top-rated movies achieve **4.0+ average ratings**.
- 🎬 **Drama** and **Comedy** are the most popular genres.
- 📊 **3,883 movies** across **18 genres** provide diverse content.
- 📈 Overall average rating is **2.98**, indicating scope for quality improvement.

Business Recommendations

- 🎬 Invest in **Drama** and **Comedy** content.
- ★ Promote top-rated movies to increase engagement.
- 📊 Use **rating count thresholds** for reliable rankings.
- 🔍 Review low-rated content to improve catalogue quality.

Expected Outcomes

- 📈 Higher viewer engagement.
- 📊 Improved subscriber retention.
- 🎬 Better content acquisition decisions.
- 📊 More accurate, data-driven recommendations.

Customer/ User Profiling

5

Dashboard Design

What should stakeholders track in Power BI?

Business INSIGHTS

Drama and **Comedy** SIGNIFICANTLY dominate and provide broad appeal overall

Customer demographics provide context for segmentation and reporting dashboards. They are generally balanced in terms of country, device usage, and subscription type. The age group encompasses a broad range of diverse users.

- **Age** influences secondary genre preferences.
- **Regional** differences support localisation.
- **Subscription status** can inform targeted promotions and retention.

- Free Subscribers are good potential for conversion to subscription conversion (but needs further behavioral analysis to strengthen)
- A core catalogue can be complemented by **localised** content strategies.

Clear dashboards improve executive decision-making.

EXPLAIN **BUSINESS RECOMMENDATION**

Business RECOMMENDATIONS

1

Prioritise Drama and Comedy as Core Content

- **Retention:** Prioritise Drama and Comedy as the core content catalogue while
- **Growth:** Selectively expanding high-performing Action content. Action, Thriller and Romance are worth considering for growing the collection

2

Content Personalisation using customer segmentation

- Use **customer segmentation** (age, country, and subscription status) to **personalise** content promotion and marketing strategies.
- Support international growth through a global catalogue complemented by **region-specific content promotion**.

3

PowerBI Dashboard for Continuous Improvement and Monitoring

- Deliver an **executive Power BI dashboard** that provides clear KPIs and decision-focused visualisations.
- **Continuously monitor** for future reference and improvement.

4

Collect behavioural engagement data after launch

- Collect **behavioural engagement data** after launch to enable future conversion modelling, churn prediction, and advanced analytics.
